

## HW-BUG REGRESSIVE

Corrective type.

- 1) When I select to play an audio it doesn't work.
- 2) Correct the code to allow the selected audio to play.
- 3) When a video ad is shown, the playback audio and the ad audio overlap.
- 4) I ask myself to test if you hear after clicking the audio playback.
- 5) In order to understand the reproduced audio I need to listen to the audios separately.
